Bachelor of Information Management (BIM) student with over one year of hands-on experience developing web applications using Python and Django. Skilled in backend development, authentication, CRUD operations, Git, SQLite, HTML, CSS, and JavaScript. Seeking a Python/Django internship to apply and expand my software development skills.

EDUCATION

Bachelors in Information Management

Bhaktapur Multiple Campus

Bhaktapur

Nov, 2022 – Present

I am currently pursuing a Bachelor's degree in Information Management at Bhaktapur Multiple Campus, affiliated with Tribhuvan University. This interdisciplinary program combines courses in Information Technology and Business Management, equipping me with both technical and managerial skills relevant to today's digital economy.

PROJECTS

Academic Resource & Learning Management System

A comprehensive platform for managing academic resources, study materials, and learning activities. Built using Python and Django framework with SQLite database. Implemented secure authentication systems, role-based access control, complete CRUD operations, and robust database management. Gained practical experience in building scalable backend solutions for educational platforms.

TODO App

A web-based task management application that enables users to create, edit, complete, and delete tasks. Built using Python/Django, the project showcases skills in authentication, CRUD functionality, responsive UI design, and database management with SQLite.

My Portfolio Website

Responsive personal portfolio website showcasing projects, technical skills, and contact information. Built with HTML, CSS, and JavaScript using modern responsive web design principles.

SKILLS

Python, Django, JavaScript, HTML, CSS, SQLite, Git, GitHub, Bootstrap, Authentication, CRUD Operations, Role-based Access Control,

LANGUAGE

Nepali, English
