Bachelor of Information Management (BIM) student with hands-on experience in Python and Django web development. Built multiple full-stack web applications using Django, SQLite, HTML, CSS, JavaScript, and Git. Seeking a Python/Django internship to apply backend development skills and continue learning in a professional environment.

EDUCATION

Bachelors in Information Management(BIM)

Bhaktapur Multiple Campus

Bhaktapur

Nov, 2022 – Present

Relevant Coursework

• Programming with Python • Database Management System • Software Design and Development • Web Technology I & II • Data Structure and Algorithms • Information Security

PROJECTS

Academic Resource & Learning Management System

Python | Django | SQLite | Bootstrap

A comprehensive platform for managing academic resources, study materials, and learning activities. Built using Python and Django framework with SQLite database. Implemented secure authentication systems, role-based access control, complete CRUD operations, and robust database management. Gained practical experience in building scalable backend solutions for educational platforms.

TODO App

Python | Django | HTML | CSS | Bootstrap | SQLite

A web-based task management application that enables users to create, edit, complete, and delete tasks. Built using Python/Django, the project showcases skills in authentication, CRUD functionality, responsive UI design, and database management with SQLite.

My Portfolio Website

HTML | CSS | JavaScript

Responsive personal portfolio website showcasing projects, technical skills, and contact information. Built with HTML, CSS, and JavaScript using modern responsive web design principles.

SKILLS

Python, Django, JavaScript, HTML, CSS, SQLite, Git, GitHub, Bootstrap, Authentication, CRUD Operations, Role-based Access Control,

LANGUAGE

Nepali, English
